

ENVIRONMENTAL POLICY

Felice Conserve S.r.l. processes 100% Italian fresh tomatoes sourced from agricultural suppliers certified according to the Protocol of Good Agricultural Practices and members of the Quality Agricultural Work Network. This approach minimizes the use of pesticides, prioritizing environmental protection, waste management, gender equality, and the reduction of gangmastering.

Environmental impact reduction is achieved through factors like technological upgrades to processes, systems, and equipment, waste categorization, and swift responses to emergencies.

Respect for nature has consistently been a primary objective of the company, as safeguarding the environment equates to safeguarding its products. Consequently, the Management has publicly pledged its dedication to the local community and established an environmental policy within which the.

Resolutions to enhance performance and mitigate the environmental impacts are linked to our operations.

With this objective in mind, the company considers the following:

- Ensuring compliance with all applicable mandatory and non-mandatory legal provisions concerning the environment in the production context.
- Inhibiting pollution, reducing environmental impacts, and minimizing energy, natural resource, and raw material consumption.

- Verifying and overseeing adherence to the environmental policy and the implementation of corrective actions, utilizing internal audits and management review.
- Providing customers with relevant information regarding the handling, utilization, and disposal of the products supplied by our company, in consideration of environmental conservation.
- Managing the packaging, transportation, and disposal of products to minimize environmental impacts.
- Raising suppliers' awareness in terms of respecting and adhering to environmental procedures.

Felice Conserve S.r.l. commits to advancing continuous improvement goals regarding its environmental impact, as a fundamental aspect of its operations and a strategic pledge, and to consistently assess environmental management.
